20+ Languages and growing

Ruby, Python, C++, Javascript, and more.

[View supported languages.](#)

Supports Every CI Provider

Plug and play into any CI product and workflow.

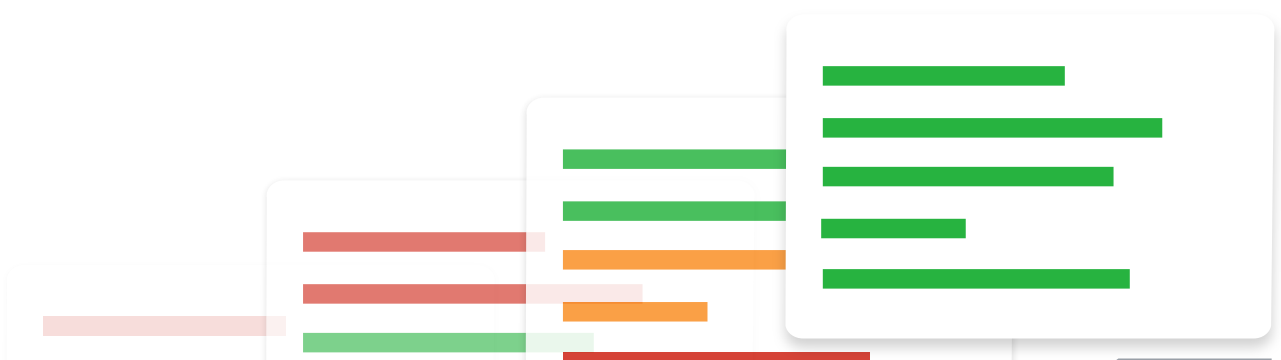

[View supported providers.](#)

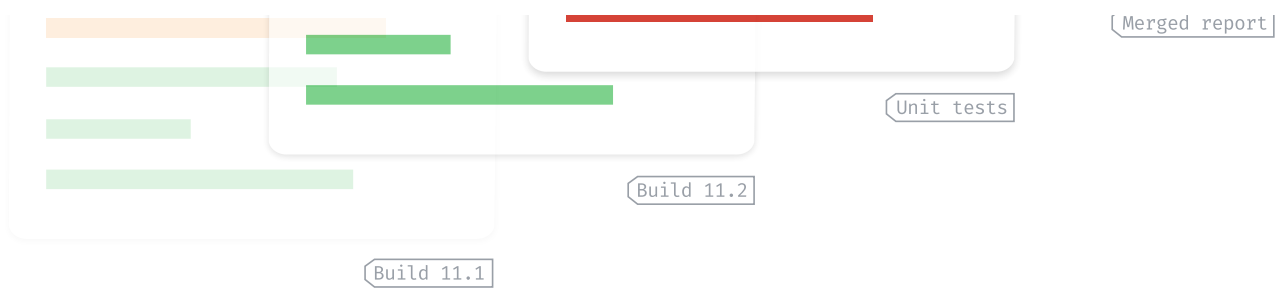

Upload reports with one line

Get started in seconds.

[Learn more.](#)

Merge reports automatically.

No setup required. Automatic report merging for all CI and languages into a single report. Get custom statuses on any group of coverage metrics. Review coverage reports by project, folder and type test (unittests vs integration tests).

- ✓ Parallelized builds
- ✓ Multiple languages
- ✓ Report grouping
- ✓ Isolate coverage per folder or internal project
